

SAP SCM EWM 9.2 Implementation in India's fastest growing premium lifestyle company

BUSINESS OBJECTIVE

SAP EWM 9.3 Implementation across 11 different (RM, WIP, Packaging Material, Byproducts and Finished Goods) warehouses

BUSINESS COMPLEXITIES

- Implementation within 3 months of project kick off
- Re-engineer the business processes to improve the productivity and tracking
- Integration with RFID for improved traceability
- Process standardization leveraging standard EWM functionalities to maximum extent
- Design processes across 3 different types of warehouses and templatize the solution for roll outs

“Fast track implementation with focus on improving traceability and reducing manual intervention by process standardization”

PROJECT HIGHLIGHTS

- First EWM implementation in India with RFID solution
- Pilot EWM implementation across various warehouses in Anjar plant followed by roll out in Vapi plant
- Standardization of IT landscape in supply chain with seamless interfaces with SAP ERP modules
- Creation of templates for three different type warehouses and roll out across 11 different Warehouses

VALUE DELIVERED TO THE CLIENT

- RFID tagging to enable end-to-end traceability and visibility across the supply chain
- Paperless operations leading to improved productivity

Stellium is re-imagining Supply Chain and Manufacturing by intelligently connecting People, Goods, Systems and Machines to make our clients future ready
